The HPC Advisory Council (HPCAC) is teaming up with ISC Events to host the HPCAC-ISC Student Cluster Competition (SCC). HPCAC-ISC Student Cluster Competition (SCC) is designed to introduce the next generation of students to the international high performance computing (HPC) community. The SCC features teams of university undergraduates competing against each other to get maximum performance on real-world scientific applications while staying under a power cap. This is an excellent educational opportunity for students around the world to showcase their knowledge and skillsets and to engage with leading commercial vendors.

**Sponsor the HPCAC-ISC SCC and become an advocate for the future of HPC**

ISC estimates more than 2,600 attendees and 160 exhibitors from around the globe will meet in Frankfurt, Germany from July 12-16, 2015. We offer high-tech enterprises, which utilize the power of HPC in their business, the opportunity to sponsor the SCC in a variety of ways. All sponsorship funds will flow directly into the competition, enabling the students to travel to Frankfurt and participate in the competition for four days in a comfortable environment. The upcoming ISC 2015 competition in Germany will have teams from nearly every continent. The friendly competition will conclude with an awards ceremony, recognizing all teams in different categories, on the keynote stage, in front of the conference attendees.

Interest in these events is growing rapidly with the increased number of venues, teams, and sponsoring organizations. The HPC community has embraced these competitions as both a fun and compelling event to watch and an important vehicle they can use to engage students and get them interested in scientific and technical careers. HPC vendors are also enthusiastically supporting their teams and the competition as a whole – and getting great exposure to end-user customers in the process.
Sponsorship Packages:
