HPC Advisory Council Announces Israel Supercomputing Conference 2012

Sponsorship Opportunities Now Available

SUNNYVALE, CA. and TEL AVIV, ISRAEL – Dec. 12, 2011 – The HPC Advisory Council, a leading organization for high-performance computing research, outreach and education, will host the [HPC Advisory Council Israel Supercomputing Conference 2012](#) at the Tel Aviv University, Tel Aviv, Israel on February 7, 2012. The conference will focus on High-Performance Computing (HPC) usage models and benefits, the future of supercomputing in Israel, latest technology developments around the world, trends, how high-performance computing can benefit small to large businesses and accelerate research activities, HPC best practices and advanced HPC topics. The conference is open to the public and will bring together system managers, researchers, developers, computational scientists and industry affiliates from Israel and abroad.

“Continuing our successful international conference programs, the HPC Advisory Council Israel Supercomputing Conference is expected to uphold our tradition of providing rich educational content, taught from some of the industry’s most recognized luminaries and scientists,” said Gilad Shainer, chairman of the HPC Advisory Council. “High-performance computing is critical for enhancing science, research and product development. Our conference attendees will gain the knowledge on how to best leverage high-performance computing for such activities and how to better leverage HPC system capabilities and improve productivity and efficiency.”

For the complete agenda and schedule, please refer to the [conference website](#). Attendance to the conference is free. Registration is required and can be made at the HPC Advisory Council Israel Supercomputing Conference [registration page](#).

Sponsorship opportunities are available today and provide exceptional "budget-conscious" awareness opportunities. Media sponsorship and coverage is being provided by insideHPC.

About the HPC Advisory Council

The HPC Advisory Council's mission is to bridge the gap between high-performance computing (HPC) use and its potential, bring the beneficial capabilities of HPC to new users for better research, education, innovation and product manufacturing, bring users the expertise needed to operate HPC systems, provide application designers with the tools needed to enable parallel computing, and to strengthen the qualification and integration of HPC system products. For more information about the HPC Advisory Council, please visit www.hpcadvisorycouncil.com.
