HPC Advisory Council and the International Supercomputing Conference Announces Call for Submissions for HPCAC-ISC 2014 Student Cluster Competition

Student teams to compete and demonstrate the incredible capabilities of state-of-the-art high-performance cluster hardware and software during the ISC'14 conference

Sunnyvale, Ca. – Aug. 21, 2013 – The HPC Advisory Council (HPCAC), a leading organization for high-performance computing research, outreach and education, and the International Supercomputing Conference (ISC), today announced the return and expansion of the widely successful [HPCAC-ISC Student Cluster Competition](#) in next year's ISC'14 program of events. In a real-time competition, 11 teams of undergraduate students from around the world will build a small cluster of their own design on the ISC'14 exhibit floor and race to demonstrate the greatest performance across a series of benchmarks and applications. It all concludes with a ceremony on the main conference keynote stage to award and recognize all student participants in front of thousands of HPC luminaries.

“The HPCAC-ISC Student Cluster Competition is designed to introduce the next generation of students to the international high-performance computing community, and we are pleased to be able to expand the number of competing teams from 9 to 11,” said Gilad Shainer, chairman of the HPC Advisory Council. “This is an excellent educational opportunity for students around the world to showcase their knowledge and skillsets and to engage with leading commercial vendors. We look forward to continuing our work with the ISC team to produce a very competitive and fun challenge for all involved.”

“The HPCAC-ISC Student Cluster Competition is an opportunity to showcase our brightest students’ expertise in a friendly, yet spirited competition,” said Dr. Hans Werner Meuer, ISC General Chair. “We look forward to working with the HPC Advisory Council and are excited to, once again, host this very engaging competition at next year’s ISC’14.”

“The HPCAC-ISC Student Cluster Competition has been a fantastic addition to the ISC program and is a great showcase for both the universities and their student teams,” said Dan Olds, Principal Analyst at Gabriel Consulting Group. “Students who participate in these competitions find it jumpstarts their careers in technology and research. We’ve also seen universities use these events as a way to increase the breadth and depth of their HPC curriculums.”

Submissions are open now with detailed information on the [HPC Advisory Council website](#), as well the ISC’14 web site. Team preparation prior to the competition includes working with supervisors and vendor partners to design and build a winning cluster from commercially available components not exceeding power limit, and to learn the predetermined HPC applications. A video of the HPCAC-ISC 2013 Student Cluster Competition is available on [YouTube](#). For more information, sponsorship and general questions please email scc@isc-events.com.

About ISC’14

Now in its 29th year, ISC is the world’s oldest and one of the most important conferences for the HPC community, offering a strong five-day technical program with a wide range of expert speakers and exhibits from leading research centers and vendors. A number of events complement the technical program, including Tutorials, Workshops, Top500 Announcement, Research Paper Sessions, Birds of a Feather (BoF) Sessions, Research Poster Session, Exhibitor and Start-up Forums and the popular "Hot Seat Sessions" featuring leaders from industry and research centers.

ISC'14 is open to IT-decision makers, scientists, members of the HPC global community and other interested parties. The ISC exhibition allows analysts, decision-makers from the automotive, defense, aeronautical, gas & oil, banking and other industries; solution providers, data storage suppliers, distributors, hardware and software manufacturers, the media, scientists and universities to see and learn firsthand about new products, applications and technological advances in the supercomputing industry today.

About the HPC Advisory Council

The HPC Advisory Council's mission is to bridge the gap between high-performance computing (HPC) use and its potential, bring the beneficial capabilities of HPC to new users for better research, education, innovation and product manufacturing, bring users the expertise needed to operate HPC systems, provide application designers with the tools needed to enable parallel computing, and to strengthen the qualification and integration of HPC system products.
